## EDUCATION

---

New L.J Institute Of Engineering And Technology [GTU]

Ahmedabad, India

August 2024 – Present

## SKILLS

---

### Technical Skills

- **Languages:** C++, Java, Python, JavaScript
- **Web Tech:** HTML, CSS, React, Node.js
- **Core:** DSA, OOP, Machine Learning
- **Tools:** Git, APIs, Database Management
- **Security:** Log Analysis, Forensics

### Communication Skills

- **Languages:** English, Hindi, Gujarati (Fluent)
- **Technical:** Documentation, Presentations
- **Client:** Requirement Analysis, Proposals
- **Collaboration:** Team Leadership, Problem Solving

## EXPERIENCE

---

### 1. Deloitte Australia - Forage Remote

[May 2025]

#### – Software & Technology Developer (Virtual Experience)

- Completed virtual job simulation focused on technology consulting and development
- Developed coding solutions as part of real-world task simulations
- Wrote proposals for client-facing data dashboards, emphasizing user needs and technical feasibility
- Gained exposure to Deloitte's problem-solving approach and client communication strategies
- [Certificate](#)

#### – Cyber Security Analyst (Virtual Experience)

[May 2025]

- Conducted forensic analysis of internal web access logs for potential data breach investigation
- Analyzed network security protocols and identified suspicious automated activities
- Provided recommendations for log monitoring, anomaly detection, and API security measures
- Specialized in internal network breach analysis for industrial manufacturing systems
- [Certificate](#)

## PROJECTS

---

### 1. AI-Powered Traffic Congestion Prediction and Disease Surveillance System - [GitHub](#)

- Developed for **SSIP GUJARAT Hackathon** organized by Government of Gujarat
- Implemented machine learning algorithms for traffic pattern analysis and disease outbreak prediction
- Built comprehensive surveillance system using Python, data analytics, and AI/ML frameworks
- Integrated real-time data processing for traffic optimization and public health monitoring
- Utilized technologies: Python, Machine Learning, Data Science, API Integration

### 2. Responsible Gaming and Tech-Driven Solutions - [GitHub](#)

- Developed for **i-hack 2025** program organized by **E-CELL, IIT BOMBAY**

- **Selected in Top 20 teams** out of 500+ participating teams
- Created comprehensive gaming platform with responsible gaming features and addiction prevention mechanisms
- Implemented multiple tech-driven solutions including user behavior analysis and intervention systems
- Built features for time management, spending limits, and mental health support integration
- Technologies used: Full-stack development, Data Analytics, Behavioral Psychology Integration
- [Certificate](#)

## CERTIFICATIONS

---

### 1. ISRO Certification in AIML - Indian Space Research Organisation (ISRO)

- Completed comprehensive course in AI and Machine Learning (AIML) with specialization in Geodata Analysis
- Date: September 23, 2024
- [Certificate Link](#)

### 2. Microsoft Certification in AI and Machine Learning

- Demonstrated expertise in AI and Machine Learning using Microsoft technologies
- Date: August 25, 2024
- [Certificate Link](#)

### 3. Build With India Hackathon

- Participated in national-level hackathon focusing on innovative solutions for India's development
- [Certificate](#)
